Honest Goods at Honest Prices

## PAULS VALLEY MAN LOST OUT

### Claude Weaver's Petition Denied by Election Board--Won't Let Watonga Negro Run--Ballots Will be Ready on Time.

Guthrie, Aug. 29.—The state election board awarded the contest for place on the legislative ticket in Comanche county to J. Roy Williams of Lawton. It held that the constitutional convention having eliminated one place the two nominees were equal in their standing. That as both Williams and Beaty of Temple, the latter counting on the ground of having a greater number of votes, had agreed to arbitrate their claims before the democratic county central committee, they should abide by its decision. The county central committee gave the nomination to Williams.

The board also denied the petition of Claude Weaver of Pauls Valley to have his name substituted on the democratic congressional ticket in the fifth district for that of Scott Ferris of Lawton.

The board ruled that it would not revoke the action of the delegations prior to organization of the convention and would not decide the legality of the sixteen votes cast by the Jacobs delegates from Pottawatomie county, which have been contested in the convention. The first Hobart convention and the certificate issued by the chairman declaring Ferris to be the nominee were both recognized as regular.

Weaver's attorneys believed it was

possible for the board to decide that no nomination had been made, and he filed his petition to become a candidate in event such decision was rendered. Upon the board declaring that Ferris had been nominated Weaver withdrew his petition and publicly proclaimed allegiance to Ferris.

The petition of George F. Robinson, negro of Watonga, to go on the ticket as an independent republican candidate for legislature in the second district was also denied. Seymour Foose of Watonga, representing the republican state committee, presented a brief of twenty-two reasons why the petition should not be granted.

The board announced that the application was ruled out because it did not appear to be regular, and failed generally to conform with statutory requirements.

Proof of the official ballot was furnished the board today by the printers. The ticket has three columns in this order: Republican, Democratic, Socialist. The republican sign is an eagle, a rooster indicates the Democratic and a hand the socialist.

It is announced nearly all of the Indian Territory county tickets will be ready for delivery in ten days.

Chapman & Verity of Shawnee, holding the state ticket contract, say they will have no difficulty in delivering the 2,000,000 ballots as per schedule.

## BRIDGE COLLAPSED--84 DEAD

### Section of New Quebec Bridge Gives Way--Workmen go Down and Perish in Swift Waters.

Quebec, Aug. 29.—A section of the new bridge across the St. Lawrence river, five miles below this city, collapsed today, carrying scores of workmen and mechanics into the water. A careful estimate places the loss of life at 84.

The bridge was about a mile and a half in length and half of it, from the south shore to mid-stream, crumpled up and dropped into the water. Ninety men were at work on this section of the structure and the whistle had just blown at 5:30 for the men to quit work for the day when they heard a grinding sound from the bridge mid-stream. The men turned to see what had happened and an instant later the cry went up "the bridge is falling."

The men made a rush shoreward, but the distance was too great for them to escape. The fallen section of the bridge dragged others after it, the snapping grinders and cables booming like a crash of artillery. Terror lent fleetness to the feet of the frightened workmen as the ysped shoreward, but only a few of them reached safety before the last piece of iron work on the south shore was dragged into the river.

Near the shore the wreckage of the bridge did not go below the surface of the water and eight workmen who remained above water were rescued and taken to the hospital at Levis.

The steamer Glenmont had just cleared the bridge when the first section fell and the water thrown up by the debris came clear over the bridge of the steamer. The captain at once lowered boats. The small boats plied back and forward over the sunken wreckage for half an hour, but the iron and steel had its victims in a terrible death grip. A few floating timbers and the broken strands of the bridge toward the north shore were the only signs that anything unusual had happened. There was not a ripple on the smooth surface of the St. Lawrence as it swept along toward the gulf.

All the men drowned were the employees of the Phoenixville Bridge Co. and sub-contractors of Quebec and

Montreal. At ten o'clock tonight sixteen bodies had been picked up and of the eight men in the hospital two are not expected to live throughout the night.

The Quebec bridge was begun about seven years ago and it was to be finished in 1909. Subsidies have been granted by the federal and provincial governments of the city of Quebec, and the estimated cost of the work was \$10,000,000.

## Booze Got Busted.

A barrel of liquid at the Katy station consigned to Haskell Grocery Co., Ada, excited the suspicion of U. S. Deputy Marshal Chapman, and he broke into it, finding 18 gallons of whiskey which he promptly consigned to the gutter.

There were several reasons for suspecting something wrong: There is no such firm as the Haskell Co. known in Ada; Charles N. is the only Haskell known in these parts and it is a notorious fact that he is neither on the booze side nor the barrel side in the present campaign.

**HASKELL AND THE CORPORATIONS.**  
Republican speakers and corporations seem to think they have conclusively answered every argument of Haskell for the regulation and control of railroads and other corporations when they point to the fact that Haskell himself has been active in organization of corporations and in promoting railroads. Haskell pretends to eat corporations alive, they say, yet he is connected with more corporations than any other man in the state, and they call this a logical answer to Haskell.  
These critics assume that they have made a wonderful revelation when they have paraded Haskell's corporation connections, but there is really nothing new or startling about revealing what is known, admitted facts. Has Haskell ever denied that he has been connected with corporations? Has he ever denied that he has built railroads? Never. And neither have his supporters denied or cared to deny such statements. And has Haskell ever declared that he is the implacable foe of the corporation regardless of its character? No, and only his enemies have tried to put him in such a false position. Here is his position as stated in his speech of acceptance:  
"The great railroad company is a public necessity. The great corporation engaged in commerce, manufacturing or mining, or other affairs of business are indispensable to modern conditions and progress. We should encourage them. But no corporation has ever found its growth on oppression of the struggling masses of humanity," and he goes on to say that the people will never tolerate any dictation of the corporations in the affairs of the government.  
Mr. Haskell has made his position clear in numerous public utterances. He is the friend of the honest corporation that conducts its affairs in a legitimate way but the dishonest corporation, seeking to influence legislation to evade the laws made for its regulation, receives no mercy at his hands. And so, what is all this cry about Haskell's corporation connections except to blind the voter's eye to the real issue and put the democratic nominee in a false light? Far from being disqualified for the office of governor and enforce the laws in respect to corporations, Mr. Haskell is all the better prepared for such service by his successful business experience. He knows what an honest and legitimate corporation can do and how it should conduct its affairs and it won't take him long to get onto the curves of the crooked ones and chase them out of Oklahoma. He knows how to give the honest corporations a square deal and how to curb and control those that would conduct their business in defiance of law or the rights of the people.  
This is Haskell's position and no amount of misrepresentation and buncombe from his enemies, no representation of slanderous charges, all of which have been refuted, can disguise it.—Chickasha Express.

**Criminal Negligence of the System.**  
The horrible killing of several persons in the wreck on the Frisco railroad last Saturday afternoon, while perhaps chargeable to the carelessness and incompetence of some telegraph operator, is really chargeable to the men "higher up." It is the fault of the system, the fault of a policy which puts dividends and stock jobbing above human life and every other consideration. What do the people of New York, or New Port, or Europe, who get fat dividends and interest on the bonds, care for the loss of a half a dozen or two or three dozen lives in the Indian Territory?  
It is just such awful tragedies as this which have marked the conduct of the railroads from the beginning. They are operated and managed as a business enterprise. They are not operated and managed for the purpose of giving the greatest security to property and life at a reasonable cost. They are not operated and managed for the purpose of giving the people some return for the extraordinary privileges which they enjoy. But they are operated and managed to play battle-door and shuttle-cock on Wall street. They are operated and managed so there will always be an excuse and a reason for more fictitious securities for more wind and water in the bonds and the stocks.  
The worst feature of this system of management and operation is that by far a larger per cent of the employees are under paid and are worked unreasonable hours if they are not really incompetent. What telegraph operator who really understands the business and is possessed of average intelligence will work for \$40 a month when he can get twice or three times that amount anywhere else at reasonable hours of work? And yet it is upon the operator, too frequently the operator at some insignificant and lonesome sidetrack, that the whole responsibility for the safety of life depends. This was just the case Saturday. It has been the case so often heretofore that it has ceased to excite comment. There should be something done by the people through the legislature to put a stop to this employment of boys and girls and this working men sixteen and eighteen hours a day. There should be a commissioner composed of expert telegraph operator, one expert engineer, and one experienced trainman, who should examine every operator, every engineer and every trainman in the state and require them to have certificates before they will be permitted to operate trains in this state. The expenses of the commission should be paid by the railroads as has been done in other states where there are similar commissions or commissioners nearly similar.  
This commission by refusing to license inexperienced and incompetent servants would raise the standard of intelligence inevitably and the standard of wages as well. Because if the operators and trainmen would not take service at present inadequate compensation the rate of pay would have to be raised in order to secure the proper grade of employees to rightly handle the property.  
Then there ought to be a law providing that the management of the railroad, the president, the directors and the general manager and the rest of the men high up should be jointly reliable with the trainmen who are directly the cause of the wreck. By the time a few railroad presidents and a few of the directors had to come to Oklahoma and face a jury on a charge of murder you would see a change in the system of management and operation. Get right at the fountain head of the corporation and the management and go right down the line. That's the way and things are coming to that pass. Rather are people being driven to that pass as a last measure of self protection.—Tulsa Democrat.

To the Voter of the 23rd Senatorial District:

I am a candidate on the republican ticket for state senator from the 23rd senatorial district, composing the counties of Pontotoc and Seminole.

I respectfully solicit the vote and influence of all persons who believe in sound government, economical administration and a square deal for every person, regardless of his political affiliation or condition in life.

My residence in the Indian Territory for thirteen years and practical knowledge of the conditions in this part of the new state and the needs of our citizens, amply qualifies me for the important trust which I seek.

If you are in favor of a "square deal" and the enactment of laws, that will stand as a monument to the future welfare of our new state, I will thank you for your vote and influence.

Very respectfully,  
U. G. WINN.

\$10.00 Reward

### Funeral of Dr. Coffey.

The remains of Dr. Coffey, the victim of knife wounds inflicted by Dr. Breco at Stonewall, were brought to Ada Thursday afternoon and interred in Rosedale cemetery, the funeral being conducted under auspices of the Woodmen.

Many friends of the deceased came up from Stonewall to pay their last respects.

If your grocer does not handle White Wonder Flour have him get it for you. Don't take any substitute. 137-tf

## ADA WOMEN APPEAL TO BUSINESS MEN

We, the ladies of Ada, feel that we are the home keepers and the home makers and we can not vote, but are represented at the ballot box by the men; we feel it not only a privilege but a sacred duty to ask the business men whom we support by our trade, that they heed our prayer and vote for our homes and our loved ones on the 17th of September.

This is the first time we have asked them for our support and we feel it no more than they should expect. Vote for our boys, our cradles, and our homes.

### BIG NIGHT FOR DEMOCRACY.

Citizens Assemble in Open Air and Hear Doctrine Expounded.

It was a good meeting the democrats held in front of The News office Thursday night despite the non-appearance of Hon. E. J. Giddings, of Oklahoma City, who had been advertised as the principal speaker.

Robert Wimbish and R. M. Roddie, democratic nominees respectively for county attorney and state senator, each made strong addresses to the voters. Wimbish showed up in ugly colors the element that now opposes the adoption of the constitution, pointing out such men's prototypes as those who had ever opposed constitutions and good sound government. He paid his respects in emphatic terms to the corrupt corporations which try to control the government.

Roddie took up 26 specific objections republicans have made to the proposed constitution of Oklahoma, showing in each case the provision objected to was a measure containing strong protection for the rights of the people.

Dr. Holley was called out and in impassioned words gave reasons for "the faith within him" impelling him to quit the republican party and join the democrats. A new organization of the local democratic club was perfected for the purpose of the present campaign. Otis B. Weaver was chosen chairman and R. O. Wheeler, secretary.

Burn Electra and Sunray oils. They are the best to be had 123-tf

### JUDGE U. G. WINN,

of Ada, republican candidate for state senator, 23rd district, composed of the counties of Pontotoc and Seminole will speak in the interest of his candidacy at the following places and upon the dates set opposite thereto. An equal division of time will be granted my opponent, Hon. R. M. Roddie, democratic nominee from said district, who is respectfully invited to meet me. Everybody invited to come, especially the ladies.

### COURIER JOURNAL BURNED

Great Newspaper Plant in Louisville Almost Total Loss.

Louisville, Ky., Aug. 30.—12:35 a. m.—The Courier-Journal Building is on fire and the entire fire department has been summoned to the building, which is at the corner of Fourth and Green streets.

The fire spread with remarkable rapidity and in a short time the third floor fell in. It is believed that all the employees escaped.

The building of the Courier-Journal job printing plant, one of the finest in the country, will probably be badly damaged.

At 1:10 a. m.—although the firemen seem able to confine the blaze to the building, the plants of the Courier-Journal and the Evening Times have suffered irreparable damage, and there is no question but that the whole office building, half a block in length and five stories high, will be a total loss.

The fire started at the top of an elevator shaft at the north end of the building, and is supposed to have been caused by defective insulation

### Young Kerr's Cotton Corp.

Bob Kerr, the ten-year-old son of Sam Kerr—Pontotoc county's first clerk to be—brought The News editor a handsome bouquet of open cotton bolls, a sample of his four acre crop on his father's place in the southwestern suburbs of Ada. When asked what interest his father had in the crop, Bob said his father had done most of the plowing and would help do the picking, may be, after the election is over.

## THE BABY CROP IS SCANT

WOMEN IN EVANSTON, ILL., HOWEVER, ARE PLENTIFUL.

Feminine Population of Fashionable Chicago Suburb Greatly Outnumbers Masculine—Figures of Recent Census.

Chicago.—Evanston, north shore city of wealth, pride and culture, is gaining in feminine population, is losing her masculine inhabitants and is confronted with race suicide.

This situation, regarded by sociologists as affording food for reflection, was revealed the other day with the completion of the city's annual school census.

The figures showed an increase of 470 in the feminine population, a decrease of 42 in the number of masculine inhabitants and an increase of only seven in the number under 21 years of age.

The census taker found that race

suicide was prevalent almost altogether in the homes of the wealthy. In that part of the city given over to luxury, which furnished a total population of about 12,000 in school district No. 75, there were just about the same number of children that there were in the Fifth and Sixth wards, which furnished only 4,000 people. Victor McCulloch, the census taker, who is a Northwestern university student, said that even this showing in the wealthy homes was much better than it would have been had it not been that the maids and other servants under 21 years of age were included as among "the children."

And there are considerably less children altogether in proportion to adults than there were a year ago. Especially in large districts of the city, which show an increase in the total population, there was a sharp decline in the number of children from last year. In the city as a whole there was an increase of just seven children under 21 years of age during the year. There

are 4,197 boys under 21 years of age, a loss of five for the year, and there are 4,769 girls under 21 years, an increase of 12. School district No. 76, which includes the Third and Fourth wards in the southern part of the city, showed a total growth of 79, but at the same time a loss of 66 children under 21 years of age.

That Evanston is a woman's paradise is shown in the census' revelation that there are 1,968 more females than males in the city. Last year the preponderance of women was only 1,456, but with 42 men gone there were enough females born or who moved into the town to add 512 to their majority. In fact, the city's growth has been entirely among its feminine population, no male having arrived to replace the 42 who departed. So the women have brought the total figures to 24,324, an increase of 428 over last year.

"If the women continue to increase and the men continue to decrease the situation will offer a problem too deep for even President Roosevelt," said one observer. "No matter how much the women might be inclined toward matrimony, their opportunities are lacking. Evanston will become an old maids' home."

A circumstance that has proved a surprise is the growth of race suicide among the negro population. Mr. McCulloch said that on Benson avenue, and in other districts occupied by negroes, the number of children was surprisingly small, not larger, in fact, than in the homes of the rich whites. Almost the only exception to the rule of small families among negroes was in the home of Rev. Mr. Gales, pastor of the Second Baptist church, where there was a family of eight children.

University students were not included in the census. Had they been, the total population would have been nearly 2,000 greater and the disproportion of women even larger.

### GIRL'S "FIDDLE" STOPS WORK.

St. Louis Contractor Cannot Pave Alley Because Men Want to Dance.

St. Louis.—Recent developments on Eads avenue would indicate that walking delegates and union labor pickets are not the only people who force other people to quit work.

Miss Louise Myers, of 3436 Eads avenue, is a high class performer on the violin and keeps herself up to the mark by regular practice. A contractor for the city is at present engaged in paving the alley in the rear of the Myers residence and employs several negroes in the work. The other day the contractor asked Mr. Myers to "lay off" his daughter.

"You know," he said, "this is a time contract. When your daughter plays that fiddle I can't get a lick of work out of my men. When she tunes up they just drop their spades and begin to hoe it down."

Miss Myers agreed to suspend operations for a week.

### DEW AND SNOW BLEACHING.

Will Remove the Yellowing That Comes from Long Lying.

The yellowing that comes from long lying, also many stains, have no better remedy than dew or snow bleaching. The process is of the simplest. Scald the garments in very weak borax water, let stand till they can be squeezed out, then shake them well and lay flat upon either the snow or the grass, where the sun can strike them all over. Leave a day or two, then turn over. In dew-bleaching, if the noon sun is very hot, sprinkle the garments with a fine atomizer, or a whisk broom, but do not make them very wet. Hard rain will not hurt if the grass is thick below. But in cloudy, showery weather take the things in and dry them for fear of mildew. Snow-bleaching is especially good for fine things—laces and linen cambrics. With freezing nights and sunny days, it acts like magic. And neither in dew nor snow bleaching is there any appreciable wear and tear.

### WAYS OF SERVING BANANAS.

Delicious Dishes May Be Made with Popular Fruit.

Bananas, chilled on ice, with cream and breakfast food, make a good dish. Bananas with other sliced fruits, with cherries, nuts or currants or sandwiched between cakes are a feast indeed. To try baked bananas, select good ripe fruit. Open one end of yellow fruit and peel off the skin, then split the fruit in halves lengthwise. Place in buttered pan and cover with sugar, and for each banana allow one teaspoonful of lemon juice. As soon as the juice and sugar are hot, baste with a quarter cupful of hot water and cook until the fruit looks semi-transparent. Slip onto a dish and cover with melted red currant sauce, in which place cooked cherries and strawberries. This is a good way to use berries that are too soft to serve in the usual way. Instead of the jelly, the sauce can be made of crushed berries and cherries. Let the bananas and sauce become cold before serving.

### Lemon Cream Pie.

For one large pie, beat the yolks of two eggs until light, squeeze juice and grate rind of one large lemon; add this to yolks. Take two cups sugar, mix with two tablespoonfuls cornstarch; add this to yolks and lemon and beat to a cream. Add two cups boiling water, slowly at first, then stir. Boil for five minutes, stirring constantly, so as not to stick or burn. When cool pour into a crust previously baked and cover with a meringue. Take whites of the two eggs, beat a few strokes before putting in a tablespoon of powdered sugar. Beat this stiff and spread first a plain layer, then fancy designs. Brown for a moment in a hot oven.

### Fresh Beef Tongue.

Wash the tongue, cover it with boiling water, and simmer for two hours. Take it up, skin it, take away the gristle and roots, put into a clean kettle, add two quarts of fresh boiling water, one-half pound of seeded raisins, one diced carrot, three tiny onions, one teaspoon of salt, and one-half teaspoon of peppercorns tied together in a bit of thin muslin or cheese cloth. Simmer gently for two hours. Prepare a gravy with one pint of the water, the carrots and raisins, and serve in a boat.

### Grease from Black Goods.

To remove grease from black goods use warm water and soap. Should the material be light in color, gasoline or benzine will be better. Use the gasoline in the open air and as you wash out the spots rub it dry afterward with a clean piece of the same material.

Benzine and gasoline are both inflammable if coming in contact with heat or flame. Salt dissolved in alcohol is often found to be a good thing to remove grease spots from cloth.

### Tasty Hotpot.

One pound of shoulder of lamb or beef cut up into two-inch squares, four potatoes sliced thin as for frying, one onion cut up pretty fine. In a deep dish place first a layer of meat, salt, and pepper. Over this drop one-half of the onion, then a layer of potatoes. Repeat, having a good thick layer of potatoes on top to brown nicely. Bake three hours in a rather slow oven.

### Sink Water Good for Flowers.

If you have a flower bed near the kitchen door, throw on the water which would otherwise be sent down the sink. Pansies and dahlias especially will fairly revel in such a location and reward you with the largest and brightest of blossoms. A slight of the flowers will rest one when tired and worn with the labors of the kitchen.

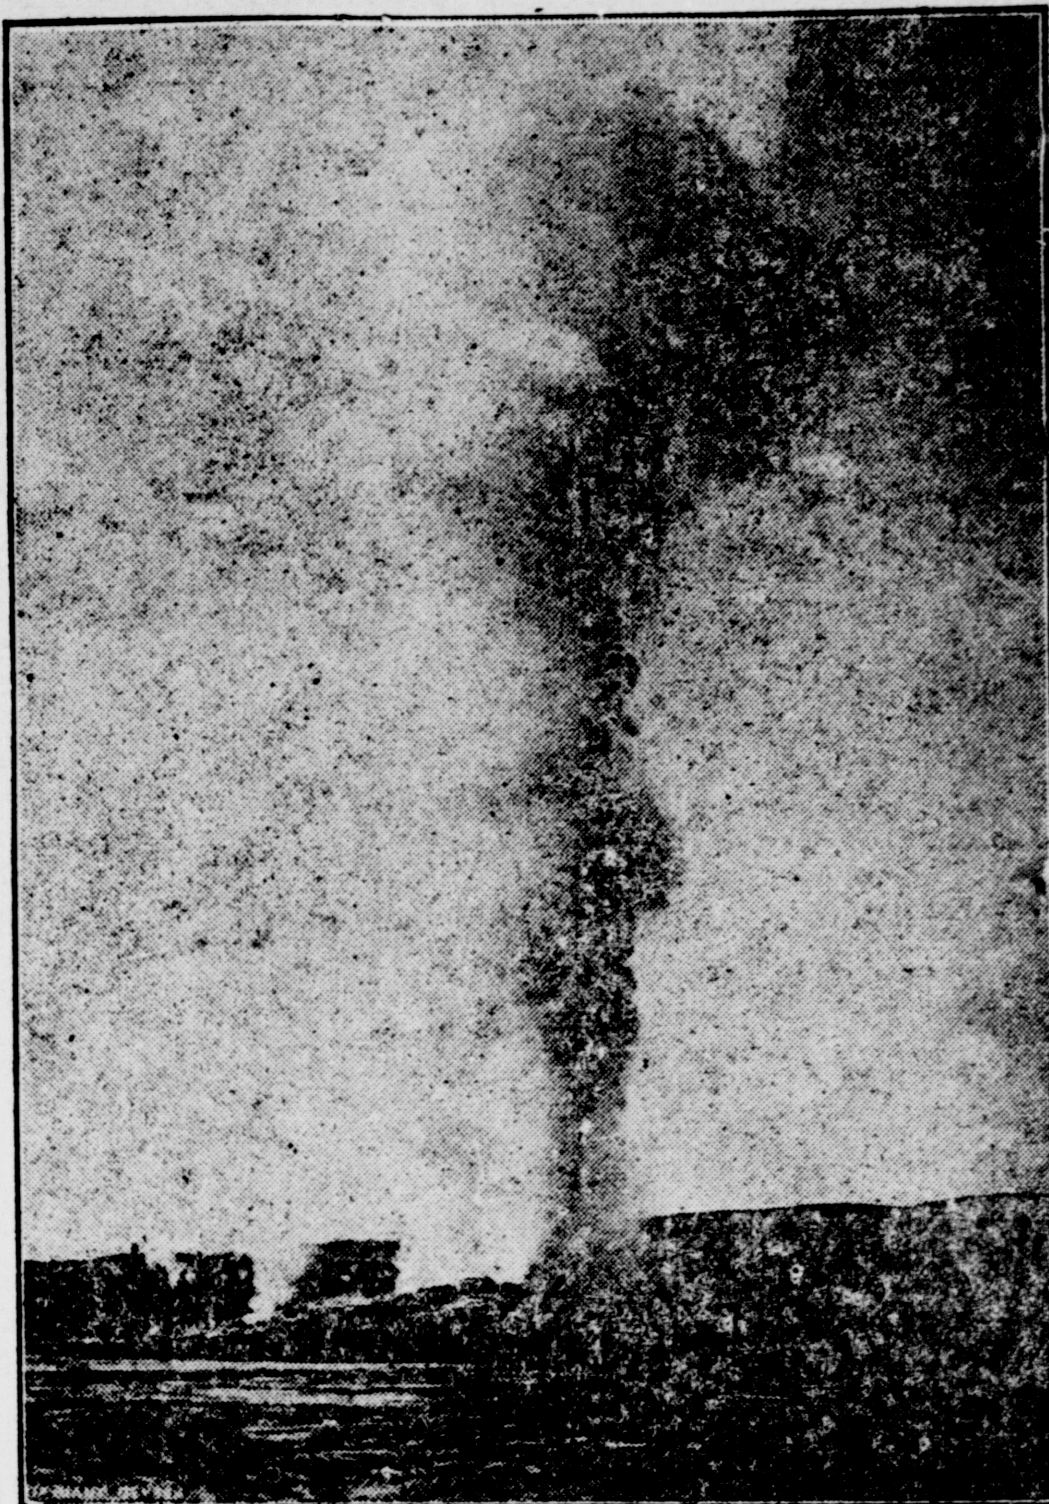

### Corn Oysters.

One pint of corn pulp; mix with one-half cupful of sweet cream, one well-beaten egg, one-half teaspoonful salt, one-quarter teaspoon pepper and one scant cup of flour. Mix well and drop by small spoonfuls in equal parts hot lard and butter. Fry on both sides until nicely browned.

### Radish and Cucumber Salad.

Arrange on a bed of carefully washed watercress alternate layers of thin slices of the red skinned radish and cucumbers, pouring over all a French dressing. The combination of the pretty red and two shades of green appeals to the eye, while the crispness and spiciness of the whole satisfy the palate.

## GIANT GEYSER IN YELLOWSTONE PARK

This famous spouter is one of the most interesting sights in the National park.

## STREAM PUMPED DRY.

JAMES B. DUKE EMPTIES JERSEY RIVER FOR BRIDE.

Woolen Mills Employing 1,000 Hands Cannot Run When Water Supply Fails—Work Resumed When Pair Leave.

New York.—In an effort to make his 2,000-acre park look like a fairyland for his bride during their honeymoon, James B. Duke pumped the Raritan river dry at Somerville, N. J., and stopped the operation of the Raritan woolen mills, the largest industry there, which depend on the stream for water supply.

Duke has on his estate artificial lakes covering several hundred acres, besides innumerable fountains and waterfalls. All of these are supplied with water from the Raritan river by means of a great pumping plant with a capacity of many millions of gallons a day, which recently was installed on the river bank above the woolen mills.

In honor of the bride in order that the fountains be made to shoot their sprays high, the lakes were filled to overflowing and cascades dashed with unusual volume over the rocks and the pumps were kept pumping night and day to keep up the display, but all the while the Raritan river, which is the second greatest watershed in New Jersey, kept dwindling until only a tiny stream found its way through its great bed. The intake of the Raritan woolen mills was left dry, and there scarcely was enough water in the wells to supply the big boilers of the mill.

The Raritan woolen mills are owned by the Einstein estate and employ more than 1,000 operatives. While the managers of the mills were inclined to do all they could to honor Duke's bride, they suddenly were confronted by a business proposition which led them to summon Manager Smith, of

the Duke estate, to look over the situation.

Mr. and Mrs. Duke had just left the estate for a three weeks' auto tour, and the manager decided there was no need to prolong the display and agreed to stop the drain from the river and give the mills a fair share of the water, so the Duke pumping plant was closed down and the river will be allowed its normal flow for several days.

### BOYS TO PAY FATHER'S DEBTS.

Sons of Ohio Forger Will Devote Lives to Work.

Keaton, O.—The two sons of former Mayor Black, who declares part of the \$28,000 proceeds of his confessed forgeries went to defray the expenses of the boys in college, will dedicate their lives to the repayment of the entire defalcation to the victims, Miss Harriet Stanley and Dr. Sepp.

"I will see that every cent of the money is paid back," announced John Black, 22 years old. "This shall be the first aim of my life."

"It shall be my duty likewise," declared his brother, William. "We will work together to remove the debt. I shall not rest until it is all discharged."

John Black has ended his junior year at Wabash college, Crawfordsville, Ind. He had planned to enter the medical school of the University of Pennsylvania this fall. Instead he will sell molasses and calico over a Bucyrus counter.

The younger brother had planned to return to Miami university. He had completed his first year there.

"We were not extravagant at college," said John, "but it is torture to learn now that every cent we had was stolen by our own father. He loved us dearly. From our childhood days he had always told us how he was determined we should have the best of educations."

## FINDS HIS LOST TEETH IN PLUG

Walters Aid Hotel Guest in Search For Missing Molars.

Chicago.—A guest took a chew of tobacco in the Victoria hotel the other night and started trouble that reached to the furthest limits of the hospitality.

It all came to a focus in the cafe when the guests and waiters regarded with curiosity a guest who suddenly struck a match held it under the table and began a careful search for some lost article.

All the other guests stopped to see where the torchlight procession was heading. The waiters flocked to aid the guest in the hope that they might recover a tip-provoking diamond.

"Done dropped er di'mun, cap'n?" queried the head waiter.

"No, confound it, I've lost two teeth."

The waiter showed a double row of them, not as an alibi, but because the grin required it. The grin did the trick.

Mad as a hornet the guest ran out to Clerk McHenry, who is as noted a peacemaker as ever stayed away from The Hague.

"I'll make you pay for them!" he shouted.

"What?" asked Mr. McHenry.

"My teeth," said the guest.

By this time everybody in the house knew that two bridge teeth, belonging

to a well dressed man, had disappeared mysteriously. The whole house was searched.

"Have you seen two teeth?" became the question of the hour.

Finally the guest pulled a plug of tobacco from his pocket and started to take a bite. There, in the side of the plug, nestled the two missing teeth.

"Here's where we dodge a law suit," said McHenry.

### Uses Fireflies as a Lamp.

Riverside, N. J.—Caleb Hatch was out late the other night with his bicycle with no lamp, and not caring to risk riding through the town without a light on his wheel he picked up a half pint whisky flask by the wayside and put a dozen fireflies in it. This he hung on the front of his machine and the flashing "lightning bugs" saved him from arrest, as the local policemen were satisfied when Hatch rode by with his wheel "all lit up."

### Fish That Kill Mosquitoes.

Naples.—A cargo of live fish from Australia has arrived here, the species called "blue eyes." Prof. Count Morner, the Swedish consul at Sydney, discovered that the fish lives wholly on mosquito larvae, and the Italian government ordered its representative in Australia to send him home a cargo of the fish. They will be distributed among all the regions infested with insects and malaria.

## WIRE IN MAN'S HEART

A REMARKABLE OPERATION OF PHILADELPHIA PHYSICIANS.

Negro Afflicted with Aneurism of the Aorta—Silver Thread Is Coiled Inside Organ and Then Taken Out Again.

Philadelphia.—Nature and a silver wire 20 feet long saved the life of Fred Williams at the end of one of the most remarkable operations on record.

It was for aneurism of the aorta, and was performed on Williams in the Medico-Chirurgical hospital by Dr. James P. Mann.

Williams, who is 39 years old, a negro barber and a man of wonderful vitality, noticed a swelling on his breast some time ago, and went to the Medico-Chirurgical hospital. There he was placed upon the operating table without having been etherized. A hollow needle was plunged into the aorta and through this the silver wire was fed from a spool. The thickness of the wire was about that of a No. 60 cotton thread. As the wire was fed into the great blood vessel it coiled itself closely in the form of a cylinder, which fitted exactly the inner surface of the affected part.

Then the needle was withdrawn and the little wound made by it was dressed.

The process that was then set up in the weakened part was this:

The blood clotted over the wire and "organized" a new wall, strengthening that which had been weakened by the aneuritic growth.

The operation was performed two months ago. Last week he came into the hospital with blood trickling steadily from a pin hole in his chest. The interne and the nurses who saw the trickle were alarmed and sent for the surgeons.

Again Williams was placed upon the operating table. The blood was found to be coming from a wound from which protruded the tip of the silver wire that had been coiled inside his aorta. With infinite care the whole strand was taken out, and then, to the amazement of everybody, the bleeding stopped.

There is every indication that the barber is now absolutely well, and that the new inner coating of the aorta is sufficiently strong to reinforce the weakened tissue that lies outside it.

"I feel as well as I ever did in my life and work every day without fatigue," said Williams.

## ALGONQUIN NATIONAL PARK OF ONTARIO

This scene, Caoha Lake from Lookout Point, Algonquin National Park of Ontario, is taken from one of the most beautiful sections of the Province of Ontario, Canada, and a territory that has been reserved for the special purpose of preserving and protecting fish and game life. It is a popular district for the summer tourist and sportsmen, those of whom make it their objective point each summer.

## NOT ELKS' TEETH AT ALL.

Commercial Article Made from Bone, Declares Fur Buyer.

Kansas City, Mo.—Local hide and fur dealers are laughing right loud over the news from Philadelphia that the Elks adopted the plan of discard the elk's tooth as the emblem of the order so "that there may be an end to the wholesale slaughtering of the elk."

Jewelers who handle elk's teeth say the stocks are low, and that they have not been added to in the last two years, but that the price has jumped from 50 cents to \$10 per pair for the teeth. M. Lyons, who has been buying furs in Kansas City for a quarter of a century, declared that 50 cents a pair would be robbery for the commercial "elk's tooth" of today.

"Because the supply is so great," was his reason. "The Elks need not worry about the supply running out so long as Armour is running and has a bone pile. Armour sorts the bones for knife handles, piano keys and elk's teeth, among other things. The 'Best People on Earth' may weep as they sit in their lodges, for the slaughter of the poor elk that the members may have their teeth chattering all over their watch chains, their coat lapels, and in their pockets, but it would be going too far to stop the industry of hunting the elk's tooth. The clubman who thinks the elk's tooth is hunted in

the far north might be shocked to learn that it is hunted in the bone pile. The dentists might tell him something about the porcelain elk's tooth."

"About how many elk hides a year does your house get?" was asked, expecting the reply to be several thousand.

"Not over a couple," it was thought. "How many elk hides are sold annually in the entire United States?"

"Not over 100."

"How many are shot by private hunting parties and the hides carried home?"

"Not over 200 elk a year are shot on the continent," the fur buyer declared ruthlessly.

"That means not over 400 elk's teeth available for the clubmen?" was suggested.

"It does not mean anything of the sort. Half the number of heads are mounted intact, keeping the teeth in them."

### Catch Is Woman's Scalp.

Hartford, Mich.—While fishing at Hull lake, near here, men brought to the surface pieces of a woman's scalp with long hair attached. Late last fall screams were heard at the Milo Root home, but as none of the women were at home no investigation was made and nothing was said until the piece of scalp was found.

## A NEW CAR OF FURNITURE

I have just received a new car of furniture which will be displayed in a few days. Look over this list and see if there is anything mentioned you need.

Bed Room Suits, Wood and Iron Beds, Odd Dressers, Princess Dressers, Chiffoniers, Rockers, Dining Tables, Center Tables, Library Tables, Kitchen Cabinets, Hall Trees and Seats. If you need any of these try me.

## EASY PAYMENT PLAN

by which you can buy and pay for your goods and not miss the money. Remember we want to do business, more business and a larger business and we know that the only way is to please our customers by giving them good goods at reasonable prices and on liberal terms.

## UNDERTAKING

I have a large line of coffins, caskets and robes and can sell you at reasonable prices. I can furnish you a hearse and an embalmer and funeral director who will take charge of the funeral without extra charge. Calls answered day or night.

## PAULS VALLEY MAN LOST OUT

### Claude Weaver's Petition Denied by Election Board--Won't Let Watonga Negro Run--Ballots Will be Ready on Time.

Cuthbert, Aug. 29.—The state election board awarded the contest for place on the legislative ticket in Comanche county to J. Roy Williams of Lawton. It held that the constitutional convention having eliminated one place the two nominees were equal in their standing. That as both Williams and Beatty of Temple the latter counting on the ground of having a greater number of votes had agreed to withdraw their claims before the democratic county central committee they should abide by its decision. The county central committee gave the nomination to Williams.

The board also denied the petition of Claude Weaver of Pauls Valley to have his name substituted on the democratic congressional ticket in the fifth district for that of Scott Ferris of Lawton.

The board held that it would not revoke the action of the delegations prior to organization of the convention and would not add the legitimacy of the name of Ferris to the ticket drawn from Fort Worth county which has been contested in the convention. The first Robert convention and the election issued by the chair and J. H. Ferris to be the nominee was both recognized as regular.

Weaver's main objection was that

possible for the board to decide that no nomination had been made and he filed his petition to become a candidate in event such decision was rendered. Upon the board declaring that Ferris had been nominated Weaver withdrew his petition and publicly proclaimed allegiance to Ferris. The petition of George F. Robinson of Watonga to go on the ticket as an independent republican candidate for legislature in the second district was also denied. Seymour Foose of Watonga representing the republican state committee presented a brief of twenty-two reasons why the petition should not be granted.

The board announced that the application was ruled out because it did not appear to be regular and failed generally to conform with statutory requirements.

Proof of the official ballot was furnished the board today by the printers. The ticket has three columns in this order: Republican, Democratic, Socialist. The republican sign is an eagle, the democratic the donkey and the socialist the hammer and sickle.

It is announced nearly all of the Indian Territory county tickets will be ready for delivery in ten days.

Chapman & Verity of Shawnee, holding the state ticket contract say they will have no difficulty in delivering the 2,000,000 ballots as per schedule.

## BRIDGE COLLAPSED--84 DEAD

### Section of New Quebec Bridge Gives Way--Workmen go Down and Perish in Swift Waters.

Quebec, Aug. 29.—A section of the new bridge across the St. Lawrence river five miles below this city collapsed today, carrying scores of workmen and mechanics into the water. A careful estimate places the loss of life at 84.

The bridge was about a mile and a half in length and half of it from the south shore to mid stream crumpled up and dropped into the water. Ninety men were at work on this section of the structure and the whistle had just blown at 30 for the men to quit work for the day when they heard a grinding sound from the bridge and strain the men turned to see what had happened and in an instant later the city went up the bridge is falling.

The men made a rush shoreward but the distance was too great for them to escape. The fallen section of the bridge dragged others after it the snapping girders and cables loomed like a crush of artillery. Perforated helmets to the feet of the frightened workmen as the ysped shoreward but only a few of them reached safety before the last piece of iron work on the south shore was dragged into the river.

Not the shore the wreckage of the bridge did not go below the surface of the water and eight workmen who remained above water were rescued and taken to the hospital at Jervis.

The steamer Glenmont had just cleared the bridge when the first section fell and the water thrown up by the debris came clear over the bridge of the steamer. The captain at once lowered boats. The small boats piled back and forward over the sunken wreckage for half an hour, but the iron and steel had its victims in a terrible death grip. A few floating timbers and the broken strands of the bridge toward the north shore were the only signs that anything unusual had happened. There was not a ripple on the smooth surface of the St. Lawrence as it swept along toward the gulf.

All the men drowned were the employees of the Phoenixville Bridge Co. and sub-contractors of Quebec and

Montreal. At ten o'clock tonight sixteen bodies had been picked up and of the eight men in the hospital two are not expected to live throughout the night.

The Quebec bridge was begun about seven years ago and it was to be finished in 1909. Subsidies have been granted by the federal and provincial governments of the city of Quebec and the estimated cost of the work was \$10,000,000.

## Booze Got Busted.

A barrel of liquid at the Katy station consigned to Haskell Grocery Co. Ada excited the suspicion of U. S. Deputy Marshal Chapman and he broke into it finding 18 gallons of whiskey which he promptly consigned to the gutter.

There were several reasons for suspecting something wrong. There is no such firm as the Haskell Co. known in Ada. Charles N. is the only Haskell known in these parts and it is a notorious fact that he is neither on the booze side nor the barrel side in the present campaign.

## HASKELL AND THE CORPORATIONS.

Republican speakers and corporations seem to think they have conclusively answered every argument of Haskell for the regulation and control of railroads and other corporations when they point to the fact that Haskell himself has been active in organization of corporations and in promoting railroads. Haskell pretends to act corporations alive they say yet he is connected with more corporations than any other man in the state and they call this a logical answer to Haskell.

These critics assume that they have made a wonderful revelation when they have paraded Haskell's corporation connections but there is really nothing new or startling about revealing what is known admitted facts. Has Haskell ever denied that he has been connected with corporations? Has he ever denied that he has built railroads? Never. And neither have his supporters denied or cared to deny such statements. And has Haskell ever declared that he is the implacable foe of the corporation regardless of its character? No, and only his enemies have tried to put him in such a false position. Here is his position as stated in his speech of acceptance:

"The great railroad company is a public necessity. The great corporation engaged in commerce, manufacturing or mining, or other affairs of business are indispensable to modern

conditions and progress. We would like to see them. But in a corporation the business grows in the possession of the struggling masses of men and women who are so busy that they will never have time to discuss the corporation as the affairs of the state.

Mr. Haskell has made his position clear in numerous public utterances. He is the friend of the honest corporation that conducts its affairs in a legitimate way but the dishonest corporation seeking to influence legislation to evade the laws made for its regulation receives no mercy at his hands.

And so what is all this cry about Haskell's corporation connections except to blind the voter's eye to the real issue and put the democratic nominee in a false light? I am from being disqualified for the office of governor and enforce the laws in respect to corporations. Mr. Haskell is all the better prepared for such service by his successful business experience. He knows what an honest and legitimate corporation can do and how it should conduct its affairs and it won't take him long to get into the curves of the crooked ones and thrust them out of Oklahoma. He knows how to give the honest corporation a square deal and how to control those that would control the business of the people.

This is Haskell's position and no amount of misrepresentation and combination from his enemies, no representation of slandersous charges, all of which I have been refused and dispensed by the Chief of the Express.

**Criminal Negligence of the System.**  
The horrible killing of several persons in the wreck on the Trisco railroad last Saturday afternoon while perhaps chargeable to the carelessness and incompetence of some telegraph operator is really chargeable to the "higher up." It is the fault of the system, the fault of a policy which puts dividends and stock jobbing above human life and every other consideration. What do the people of New York or New Port or Europe who get fat dividends and interest on the bonds care for the loss of a half a dozen or two or three dozen lives in the Indian Territory?

It is just such awful tragedies as this which have marked the conduct of the railroads from the beginning. They are operated and managed as a business enterprise. They are not operated and managed for the purpose of giving the greatest security to property and life at a reasonable cost. They are not operated and managed for the purpose of giving the people some return for the extraordinary privileges which they enjoy. But they are operated and managed to play battle-door and shuttlecock on Wall street. They are operated and managed so there will always be an excuse and a reason for more fictitious securities for more wind and water in the bonds and the stocks.

The worst feature of this system of management and operation is that by far a larger per cent of the employees are under paid and are worked unreasonable hours if they are not really incompetent. What telegraph operator who really understands the business and is possessed of average intelligence will work for \$40 a month when he can get twice or three times that amount anywhere else at reasonable hours of work? And yet it is upon the operator, too frequently the operator at some insignificant and lonesome sidetrack, that the whole responsibility for the safety of the passengers is placed.

It is the duty of the legislature to put a stop to this employment of boys and girls and this working men sixteen and eighteen hours a day. There should be a commission composed of expert telegraph operators, one expert engineer and one experienced trainman who should examine every operator every engineer and every trainman in the state and require them to have certificates before they will be permitted to operate trains in this state. The expenses of the commission should be paid by the railroads as has been done in other states where there are similar commissions of commissioners nearly similar.

This commission by refusing to license inexperienced and incompetent servants would raise the standard of intelligence inevitably and the standard of the voice of the 23rd Senatorial District.

## \$10.00 Reward

Given to any person who will tell correctly the names of the 12 samples of drugs displayed in our show window.

A beautiful box of fine stationery given to the lady who guesses most of them.

aid of wages as well. Because if the operators and trainmen would not take service at present inadequate compensation the rate of pay would have to be raised in order to secure the proper grade of employees to rightly handle the property.

Then there ought to be a law providing that the management of the railroad the president the directors and the general manager and the rest of the men high up should be jointly reliable with the trainmen who are directly the cause of the wreck. By the time a few railroad presidents and a few of the directors had to come to Oklahoma and face a jury on a charge of murder you would see a change in the system of management and operation. Get right at the fountain head of the corporation and the management and go right down the line. That's the way and things are coming to that pass. Rather are people being driven to that pass as a last measure of self protection.---Tulsa Democrat

## THE BABY CROP IS SCANT

WOMEN IN EVANSTON, ILL., HOWEVER, ARE PLENTIFUL.

Feminine Population of Fashionable Chicago Suburb Greatly Outnumbers Masculine—Figures of Recent Census.

Chicago.—Evanston, north shore city of wealth, pride and culture, is gaining in feminine population, is losing her masculine inhabitants and is confronted with race suicide.

This situation, regarded by sociologists as affording food for reflection, was revealed the other day with the completion of the city's annual school census.

The figures showed an increase of 470 in the feminine population, a decrease of 42 in the number of masculine inhabitants and an increase of only seven in the number under 21 years of age.

The census taker found that race

suicide was prevalent almost altogether in the homes of the wealthy. In that part of the city given over to luxury, which furnished a total population of about 12,000 in school district No. 75, there were just about the same number of children that there were in the Fifth and Sixth wards, which furnished only 4,000 people. Victor McCulloch, the census taker, who is a Northwestern university student, said that even this showing in the wealthy homes was much better than it would have been had it not been that the maids and other servants under 21 years of age were included as among "the children."

And there are considerably less children altogether in proportion to adults than there were a year ago. Especially in large districts of the city, which show an increase in the total population, there was a sharp decline in the number of children from last year. In the city as a whole there was an increase of just seven children under 21 years of age during the year. There

are 4,197 boys under 21 years of age, a loss of five for the year, and there are 4,799 girls under 21 years, an increase of 12. School district No. 76, which includes the Third and Fourth wards in the southern part of the city, showed a total growth of 79, but at the same time a loss of 86 children under 21 years of age.

"That Evanston is a woman's paradise is shown in the census revelation that there are 1,968 more females than males in the city. Last year the preponderance of women was only 1,456, but with 42 men gone there were enough females born or who moved into the town to add 512 to their majority. In fact, the city's growth has been entirely among its feminine population, no male having arrived to replace the 42 who departed. So the women have brought the total figures to 24,324, an increase of 428 over last year.

"If the women continue to increase and the men continue to decrease the situation will offer a problem too deep for even President Roosevelt," said one observer. "No matter how much the women might be inclined toward matrimony, their opportunities are lacking. Evanston will become an old maids' home."

A circumstance that has proved a surprise is the growth of race suicide among the negro population. Mr. McCulloch said that on Benson avenue, and in other districts occupied by negroes, the number of children was surprisingly small, not larger, in fact, than in the homes of the rich whites. Almost the only exception to the rule of small families among negroes was in the home of Rev. Mr. Gales, pastor of the Second Baptist church, where there was a family of eight children.

University students were not included in the census. Had they been, the total population would have been nearly 2,000 greater and the disproportion of women even larger.

### GIRL'S "FIDDLE" STOPS WORK.

St. Louis Contractor Cannot Pave Alley Because Men Want to Dance.

St. Louis.—Recent developments on Eads avenue would indicate that walking delegates and union labor pickets are not the only people who force other people to quit work.

Miss Louise Myers, of 3436 Eads avenue, is a high class performer on the violin and keeps herself up to the mark by regular practice. A contractor for the city is at present engaged in paving the alley in the rear of the Myers residence and employs several negroes in the work. The other day the contractor asked Mr. Myers to "lay off" his daughter.

"You know," he said, "this is a time contract. When your daughter plays that fiddle I can't get a lick of work out of my men. When she tunes up they just drop their spades and begin to hoe it down."

Miss Myers agreed to suspend operations for a week.

### DEW AND SNOW BLEACHING.

Will Remove the Yellowing That Comes from Long Lying.

The yellowing that comes from long lying, also many stains, have no better remedy than dew or snow bleaching. The process is of the simplest. Scald the garments in very weak borax water, let stand till they can be squeezed out, then shake them well and lay flat upon either the snow or the grass, where the sun can strike them all over. Leave a day or two, then turn over. In dew-bleaching, if the noon sun is very hot, sprinkle the garments with a fine atomizer, or a whisk broom, but do not make them very wet. Hard rain will not hurt if the grass is thick below. But in cloudy, showery weather take the things in and dry them for fear of mildew. Snow-bleaching is especially good for fine things—laces and linen cambrics. With freezing nights and sunny days, it acts like magic. And neither in dew nor snow bleaching is there any appreciable wear and tear. —The Delineator.

### WAYS OF SERVING BANANAS.

Delicious Dishes May Be Made with Popular Fruit.

Bananas, chilled on ice, with cream and breakfast food, make a good dish. Bananas with other sliced fruits, with cherries, nuts or currants or sandwiched between cakes are a feast indeed. To try baked bananas, select good ripe fruit. Open one end of yellow fruit and peel off the skin, then split the fruit in halves lengthwise. Place in buttered pan and cover with sugar, and for each banana allow one teaspoonful of lemon juice. As soon as the juice and sugar are hot, baste with a quarter cupful of hot water and cook until the fruit looks semi-transparent. Slip onto a dish and cover with melted red currant sauce, in which place cooked cherries and strawberries. This is a good way to use berries that are too soft to serve in the usual way. Instead of the jelly, the sauce can be made of crushed berries and cherries. Let the bananas and sauce become cold before serving.

### Lemon Cream Pie.

For one large pie, beat the yolks of two eggs until light, squeeze juice and grate rind of one large lemon; add this to yolks. Take two cups sugar, mix with two tablespoonfuls cornstarch; add this to yolks and lemon and beat to a cream. Add two cups boiling water, slowly at first, then stir. Boil for five minutes, stirring constantly, so as not to stick or burn. When cool pour into a crust previously baked and cover with a meringue. Take whites of the two eggs, beat a few strokes before putting in a tablespoon of powdered sugar. Beat this stiff and spread first a plain layer, then fancy designs. Brown for a moment in a hot oven.

### Fresh Beef Tongue.

Wash the tongue, cover it with boiling water, and simmer for two hours. Take it up, skin it, take away the gristle and roots, put into a clean kettle, add two quarts of fresh boiling water, one-half pound of seeded raisins, one diced carrot, three tiny onions, one teaspoon of salt, and one-half teaspoon of peppercorns tied together in a bit of thin muslin or cheese cloth. Simmer gently for two hours. Prepare a gravy with one pint of the water, the carrots and raisins, and serve in a boat.

### Grease from Black Goods.

To remove grease from black goods use warm water and soap. Should the material be light in color, gasoline or benzine will be better. Use the gasoline in the open air and as you wash out the spots rub it dry afterward with a clean piece of the same material.

Benzine and gasoline are both inflammable if coming in contact with heat or flame. Salt dissolved in alcohol is often found to be a good thing to remove grease spots from cloth.

### Tasty Hotpot.

One pound of shoulder of lamb or beef cut up into two-inch squares, four potatoes sliced thin as for frying, one onion cut up pretty fine. In a deep dish place first a layer of meat, salt, and pepper. Over this drop one-half of the onion, then a layer of potatoes. Repeat, having a good thick layer of potatoes on top to brown nicely. Bake three hours in a rather slow oven.

### Sink Water Good for Flowers.

If you have a flower bed near the kitchen door, throw on the water which would otherwise be sent down the sink. Pansies and dahlias especially will fairly revel in such a location and reward you with the largest and brightest of blossoms. A sight of the flowers will rest one when tired and worn with the labors of the kitchen.

### Corn Oysters.

One pint of corn pulp; mix with one-half cupful of sweet cream, one well-beaten egg, one-half teaspoonful salt, one-quarter teaspoon pepper and one scant cup of flour. Mix well and drop by small spoonfuls in equal parts hot lard and butter. Fry on both sides until nicely browned.

### Radish and Cucumber Salad.

Arrange on a bed of carefully washed watercress alternate layers of thin slices of the red skinned radish and cucumbers, pouring over all a French dressing. The combination of the pretty red and two shades of green appeals to the eye, while the crispness and spiciness of the whole satisfy the palate.

## GIANT GEYSER IN YELLOWSTONE PARK

This famous spouter is one of the most interesting sights in the National park.

## STREAM PUMPED DRY.

JAMES B. DUKE EMPTIES JERSEY RIVER FOR BRIDE.

Woolen Mills Employing 1,000 Hands Cannot Run When Water Supply Fails—Work Resumed When Pair Leave.

New York.—In an effort to make his 2,000-acre park look like a fairyland for his bride during their honeymoon, James B. Duke pumped the Raritan river dry at Somerville, N. J., and stopped the operation of the Raritan woolen mills, the largest industry there, which depend on the stream for water supply.

Duke has on his estate artificial lakes covering several hundred acres, besides innumerable fountains and waterfalls. All of these are supplied with water from the Raritan river by means of a great pumping plant with a capacity of many millions of gallons a day, which recently was installed on the river bank above the woolen mills.

In honor of the bride in order that the fountains be made to shoot their sprays high, the lakes were filled to overflowing and cascades dashed with unusual volume over the rocks and the pumps were kept pumping night and day to keep up the display, but all the while the Raritan river, which is the second greatest watershed in New Jersey, kept dwindling until only a tiny stream found its way through its great bed. The intake of the Raritan woolen mills was left dry, and there scarcely was enough water in the wells to supply the big boilers of the mill.

The Raritan woolen mills are owned by the Einstein estate and employ more than 1,000 operatives. While the managers of the mills were inclined to do all they could to honor Duke's bride, they suddenly were confronted by a business proposition which led them to summon Manager Smith, of

the Duke estate, to look over the situation.

Mr. and Mrs. Duke had just left the estate for a three weeks' auto tour, and the manager decided there was no need to prolong the display and agreed to stop the drain from the river and give the mills a fair share of the water, so the Duke pumping plant was closed down and the river will be allowed its normal flow for several days.

### BOYS TO PAY FATHER'S DEBTS.

Sons of Ohio Forger Will Devote Lives to Work.

Kenton, O.—The two sons of former Mayor Black, who declares part of the \$28,000 proceeds of his confessed forgeries went to defray the expenses of the boys in college, will dedicate their lives to the repayment of the entire defalcation to the victims, Miss Harriet Stanley and Dr. Sepp.

"I will see that every cent of the money is paid back," announced John Black, 22 years old. "This shall be the first aim of my life."

"It shall be my duty likewise," declared his brother, William. "We will work together to remove the debt. I shall not rest until it is all discharged."

John Black has ended his junior year at Wabash college, Crawfordsville, Ind. He had planned to enter the medical school of the University of Pennsylvania this fall. Instead he will sell molasses and calico over a Bueyrus counter.

The younger brother had planned to return to Miami university. He had completed his first year there.

"We were not extravagant at college," said John, "but it is torture to learn now that every cent we had was stolen by our own father. He loved us dearly. From our childhood days he had always told us how he was determined we should have the best of educations."

## FINDS HIS LOST TEETH IN PLUG

Walters Aid Hotel Guest in Search For Missing Molars.

Chicago.—A guest took a chew of tobacco in the Victoria hotel the other night and started trouble that reached to the furthest limits of the hostelry.

It all came to a focus in the cafe when the guests and waiters regarded with curiosity a guest who suddenly struck a match held it under the table and began a careful search for some lost article.

All the other guests stopped to see where the torchlight procession was heading. The waiters flocked to aid the guest in the hope that they might recover a tip-provoking diamond.

"Done dropped er d'mun, cap'n?" queried the head waiter.

"No, confound it, I've lost two teeth."

The waiter showed a double row of

them, not as an alibi, but because the grin required it. The grin did the trick.

Mad as a hornet the guest ran out to Clerk McHenry, who is as noted a peace-maker as ever stayed away from The Hague.

"I'll make you pay for them!" he shouted.

"What?" asked Mr. McHenry.

"My teeth," said the guest.

By this time everybody in the house knew that two bridge teeth, belonging

to a well dressed man, had disappeared mysteriously. The whole house was searched.

"Have you seen two teeth?" became the question of the hour.

Finally the guest pulled a plug of tobacco from his pocket, and started to take a bite. There, in the side of the plug, nestled the two missing teeth. "Here's where we dodge a law suit," said McHenry.

### Uses Fireflies as a Lamp.

Riverside, N. J.—Caleb Hatch was out late the other night with his bicycle with no lamp, and not caring to risk riding through the town without a light on his wheel he picked up a half pint whiskey flask by the wayside and put a dozen fireflies in it. This he hung on the front of his machine and the flashing "lightning bugs" saved him from arrest, as the local policemen were satisfied when Hatch rode by with his wheel "all lit up."

### Fish That Kill Mosquitoes.

Naples.—A cargo of live fish from Australia has arrived here, the species called "blue eyes." Prof. Count Morner, the Swedish consul at Sydney, discovered that the fish live wholly on mosquito larvae, and the Italian government ordered its representative in Australia to send him home a cargo of the fish. They will be distributed among all the regions infested with insects and malaria.

## WIRE IN MAN'S HEART

A REMARKABLE OPERATION OF PHILADELPHIA PHYSICIANS.

Negro Afflicted with Aneurism of the Aorta—Silver Thread Is Coiled Inside Organ and Then Taken Out Again.

Philadelphia.—Nature and a silver wire 20 feet long saved the life of Fred Williams at the end of one of the most remarkable operations on record.

It was for aneurism of the aorta, and was performed on Williams in the Medico-Chirurgical hospital by Dr. James P. Mann.

Williams, who is 39 years old, a negro barber and a man of wonderful vitality, noticed a swelling on his breast some time ago, and went to the Medico-Chirurgical hospital. There he was placed upon the operating table without having been etherized. A hollow needle was plunged into the aorta and through this the silver wire was fed from a spool. The thickness of the wire was about that of a No. 60 cotton thread. As the wire was fed into the great blood vessel it coiled itself closely in the form of a cylinder, which fitted exactly the inner surface of the affected part.

Then the needle was withdrawn and the little wound made by it was dressed.

The process that was then set up in the weakened part was this:

The blood clotted over the wire and "organized" a new wall, strengthening that which had been weakened by the aneurismic growth.

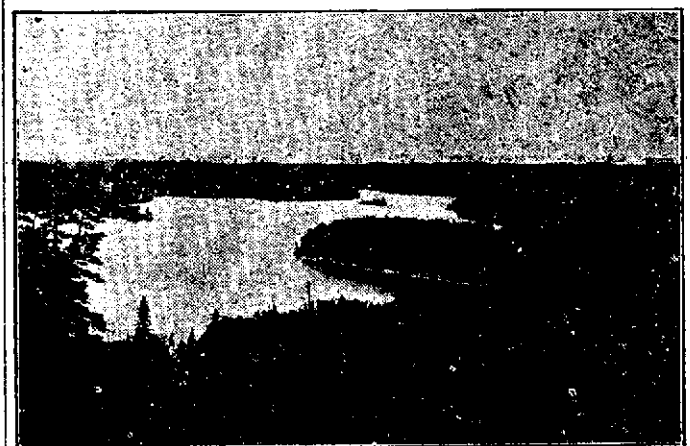

The operation was performed two months ago. Last week he came into the hospital with blood trickling steadily from a pin hole in his chest. The interne and the nurses who saw the trickle were alarmed and sent for the surgeons.

Again Williams was placed upon the operating table. The blood was found to be coming from a wound from which protruded the tip of the silver wire that had been coiled inside his aorta. With infinite care the whole strand was taken out, and then, to the amazement of everybody, the bleeding stopped.

There is every indication that the barber is now absolutely well, and that the new inner coating of the aorta is sufficiently strong to reinforce the weakened tissue that lies outside it.

"I feel as well as I ever did in my life and work every day without fear," said Williams.

## ALGONQUIN NATIONAL PARK OF ONTARIO

This scene, Caoha Lake from Lookout Point, Algonquin National Park of Ontario, is taken from one of the most beautiful sections of the Province of Ontario, Canada, and a territory that has been reserved for the special purpose of preserving and protecting fish and game life. It is a popular district for the summer tourist and sportsmen, those of whom make it their objective point each summer.

## NOT ELKS' TEETH AT ALL.

Commercial Article Made from Bone, Declares Fur Buyer.

Kansas City, Mo.—Local hide and fur dealers are laughing right loud over the news from Philadelphia that the Elks adopted the plan of discard the elk's tooth as the emblem of the order so "that there may be an end to the wholesale slaughtering of the elk."

Jewelers who handle elk's teeth say the stocks are low, and that they have not been added to in the last two years, but that the price has jumped from 50 cents to \$10 per pair for the teeth. M. Lyons, who has been buying furs in Kansas City for a quarter of a century, declared that 50 cents a pair would be robbery for the commercial "elk's tooth" of to-day.

"Because the supply is so great," was his reason. "The Elks need not worry about the supply running out so long as Armour is running and has a bone pile. Armour sorts the bones for knife handles, piano keys and elk's teeth, among other things. The 'Best People on Earth' may weep as they sit in their lodges, for the slaughter of the poor elk that the members may have their teeth chattering all over their watch chains, their coat lapels, and in their pockets, but it would be going too far to stop the industry of hunting the elk's tooth. The clubman who thinks the elk's tooth is hunted in

the far north might be shocked to learn that it is hunted in the bone pile. The dentists might tell him something about the porcelain elk's tooth."

"About how many elk hides a year does your house get?" was asked, expecting the reply to be several thousand.

"Not over a couple," it was thought. "How many elk hides are sold annually in the entire United States?"

"Not over 100."

"How many are shot by private hunting parties and the hides carried home?"

"Not over 200 elk a year are shot on the continent," the fur buyer declared ruthlessly.

"That means not over 400 elk's teeth available for the clubmen?" was suggested.

"It does not mean anything of the sort. Half the number of heads are mounted intact, keeping the teeth in them."

### Catch Is Woman's Scalp.

Hartford, Mich.—While fishing at Hull lake, near here, men brought to the surface pieces of a woman's scalp with long hair attached. Late last fall screams were heard at the Mill Root home, but as none of the women were at home no investigation was made and nothing was said until the piece of scalp was found.

## PAULS VALLEY MAN LOST OUT

### Claude Weaver's Petition Denied by Election Board--Won't Let Watonga Negro Run--Ballots Will be Ready on Time.

Cathart, Aug. 29.—The state election board awarded the contest for place on the legislative ticket in Comanche county to J. Roy Williams of Lawton. It held that the constitutional convention having eliminated one place the two nominees were equal in their standing. That as both Williams and Beatty of Temple the latter counting on the ground of having a greater number of votes had agreed to arbitrate their claims before the democratic county central committee they should abide by its decision. The county central committee gave the nomination to Williams.

The board also denied the petition of Claude Weaver of Pauls Valley to buy his name substituted on the democratic congressional ticket in the fifth district that of Scott Ferris of Lawton.

The board held that it would not revoke the action of the delegations prior to organization of the convention and would not add the names of the nominees as they had been elected from the territory. The board held that it would not revoke the action of the delegations prior to organization of the convention and would not add the names of the nominees as they had been elected from the territory.

possible for the board to decide that no nomination had been made and he filed his petition to become a candidate in event such decision was rendered. Upon the board declaring that Ferris had been nominated Weaver withdrew his petition and publicly proclaimed allegiance to Ferris.

The petition of George F. Robinson negro of Watonga to go on the ticket as an independent republican candidate for legislature in the second district was also denied. Seymour Foose of Watonga representing the republican state committee presented a brief of twenty-two reasons why the petition should not be granted.

The board announced that the application was ruled out because it did not appear to be regular and failed generally to conform with statutory requirements.

Price of the official ballot was furnished the board today by the printers. The ticket has three columns in this order: Republican, Democratic, Socialist. The republican sign is an eagle, the democratic the Demagogue and a hand the socialist.

It is announced today all of the Indian Territory county tickets will be ready for delivery in ten days.

Chapman & Verity of Shawnee, holding the state ticket contract say they will have no difficulty in delivering the 900,000 ballots as per schedule.

## BRIDGE COLLAPSED--84 DEAD

### Section of New Quebec Bridge Gives Way--Workmen go Down and Perish in Swift Waters.

Quebec, Aug. 24.—A section of the new bridge across the St. Lawrence river five miles below this city collapsed today carrying scores of workmen and mechanics into the water. A careful estimate places the loss of life at 84.

The bridge was about a mile and a half in length and half of it from the south shore to mid stream crumpled up and dropped into the water. Ninety men were at work on this section of the structure and the whistle had just blown at 10 for the men to quit work for the day when they heard a grinding sound from the bridge and stream. The men turned to see what had happened and in instant later the cry went up the bridge is falling. The men made a rush toward the shore but the distance was too great for them to escape. The fallen section of the bridge dragged others after it the snapping of cables and cables loomed like a crash of artillery. Perforated beams to the feet of the frightened workmen as the rapid shoreward but only a few of them reached safety before the last piece of iron work on the south shore was dragged into the river.

Near the shore the wreckage of the bridge did not go below the surface of the water and eight workmen who remained above water were rescued and taken to the hospital at Levis.

The steamer Glenmont had just cleared the bridge when the first section fell and the water thrown up by the debris came clear over the bridge of the steamer. The captain at once lowered boats. The small boats piled back and forward over the sunken wreckage for half an hour, but the iron and steel had its victims in a terrible death grip. A few floating timbers and the broken strands of the bridge toward the north shore were the only signs that anything unusual had happened. There was not a ripple on the smooth surface of the St. Lawrence as it swept along toward the gulf.

All the men drowned were the employees of the Phoenixville Bridge Co. and sub contractors of Quebec and

Montreal. At ten o'clock tonight sixteen bodies had been picked up and of the eight men in the hospital two are not expected to live throughout the night.

The Quebec bridge was begun about seven years ago and it was to be finished in 1909. Subsidies have been granted by the federal and provincial governments of the city of Quebec and the estimated cost of the work was \$10,000,000.

### Booze Got Busted.

A barrel of brand at the City station consigned to Haskell Grocery Co. Ada evaded the suspicion of U. S. Deputy Marshal Chapman and he broke into it finding 18 gallons of whiskey which he promptly consigned to the gutter.

There were several reasons for suspecting something wrong. There is no such firm as the Haskell Co. known in Ada. Charles N. is the only Haskell known in these parts and it is a notorious fact that he is neither on the booze side nor the barrel side in the present campaign.

## THE BABY CROP IS SCANT

WOMEN IN EVANSTON, ILL., HOWEVER, ARE PLENTIFUL.

Feminine Population of Fashionable Chicago Suburb Greatly Outnumbers Masculine—Figures of Recent Census.

Chicago.—Evanston, north shore city of wealth, pride and culture, is gaining in feminine population, is losing her masculine inhabitants and is confronted with race suicide.

This situation, regarded by sociologists as affording food for reflection, was revealed the other day with the completion of the city's annual school census.

The figures showed an increase of 470 in the feminine population, a decrease of 42 in the number of masculine inhabitants and an increase of only seven in the number under 21 years of age.

The census taker found that race

suicide was prevalent almost altogether in the homes of the wealthy. In that part of the city given over to luxury, which furnished a total population of about 12,000 in school district No. 75, there were just about the same number of children that there were in the Fifth and Sixth wards, which furnished only 4,000 people. Victor McCulloch, the census taker, who is a Northwestern university student, said that even this showing in the wealthy homes was much better than it would have been had it not been that the maids and other servants under 21 years of age were included as among "the children."

And there are considerably less children altogether in proportion to adults than there were a year ago. Especially in large districts of the city, which show an increase in the total population, there was a sharp decline in the number of children from last year. In the city as a whole there was an increase of just seven children under 21 years of age during the year. There

are 4,187 boys under 21 years of age, a loss of five for the year, and there are 4,789 girls under 21 years, an increase of 12. School district No. 75, which includes the Third and Fourth wards in the southern part of the city, showed a total growth of 79, but at the same time a loss of 66 children under 21 years of age.

That Evanston is a woman's paradise is shown in the census revelation that there are 1,968 more females than males in the city. Last year the preponderance of women was only 1,456, but with 42 men gone there were enough females born or who moved into the town to add 612 to their majority. In fact, the city's growth has been entirely among its feminine population, no male having arrived to replace the 42 who departed. So the women have brought the total figures to 24,324, an increase of 428 over last year.

"If the women continue to increase and the men continue to decrease the situation will offer a problem too deep for even President Roosevelt," said one observer. "No matter how much the women might be inclined toward matrimony, their opportunities are lacking. Evanston will become an old maids' home."

A circumstance that has proved a surprise is the growth of race suicide among the negro population. Mr. McCulloch said that on Benson avenue, and in other districts occupied by negroes, the number of children was surprisingly small, not larger, in fact, than in the homes of the rich whites. Almost the only exception to the rule of small families among negroes was in the home of Rev. Mr. Gales, pastor of the Second Baptist church, where there was a family of eight children.

University students were not included in the census. Had they been, the total population would have been nearly 2,000 greater and the disproportion of women even larger.

### GIRL'S "FIDDLE" STOPS WORK.

St. Louis Contractor Cannot Pave Alley Because Men Want to Dance.

St. Louis.—Recent developments on Eads avenue would indicate that walking delegates and union labor pickets are not the only people who force other people to quit work.

Miss Louise Myers, of 3436 Eads avenue, is a high class performer on the violin and keeps herself up to the mark by regular practice. A contractor for the city is at present engaged in paving the alley in the rear of the Myers residence and employs several negroes in the work. The other day the contractor asked Mr. Myers to "lay off" his daughter.

"You know," he said, "this is a time contract. When your daughter plays that fiddle I can't get a lick of work out of my men. When she tunes up they just drop their spades and begin to hoe it down."

Miss Myers agreed to suspend operations for a week.

### DEW AND SNOW BLEACHING.

Will Remove the Yellowing That Comes from Long Lying.

The yellowing that comes from long lying, also many stains, have no better remedy than dew or snow bleaching. The process is of the simplest. Scald the garments in very weak borax water, let stand till they can be squeezed out, then shake them well and lay flat upon either the snow or the grass, where the sun can strike them all over. Leave a day or two, then turn over. In dew-bleaching, if the noon sun is very hot, sprinkle the garments with a fine atomizer, or a whisk broom, but do not make them very wet. Hard rain will not hurt if the grass is thick below. But in cloudy, showery weather take the things in and dry them for fear of mildew. Snow-bleaching is especially good for fine things—laces and linen cambrics. With freezing nights and sunny days, it acts like magic. And neither in dew nor snow bleaching is there any appreciable wear and tear. —The Delineator.

### WAYS OF SERVING BANANAS.

Delicious Dishes May Be Made with Popular Fruit.

Bananas, chilled on ice, with cream and breakfast food, make a good dish. Bananas with other sliced fruits, with cherries, nuts or currants, or sandwiched between cakes are a feast indeed. To try baked bananas, select good ripe fruit. Open one end of yellow fruit and peel off the skin, then split the fruit in halves lengthwise. Place in buttered pan and cover with sugar, and for each banana allow one teaspoonful of lemon juice. As soon as the juice and sugar are hot, haste with a quarter cupful of hot water and cook until the fruit looks semi-transparent. Slip onto a dish and cover with melted red currant sauce, in which place cooked cherries and strawberries. This is a good way to use berries that are too soft to serve in the usual way. Instead of the jelly, the sauce can be made of crushed berries and cherries. Let the bananas and sauce become cold before serving.

### Lemon Cream Pie.

For one large pie, beat the yolks of two eggs until light, squeeze juice and grate rind of one large lemon; add this to yolks. Take two cups sugar, mix with two tablespoonfuls cornstarch; add this to yolks and lemon and beat to a cream. Add two cups boiling water, slowly at first, then stir. Boil for five minutes, stirring constantly, so as not to stick or burn. When cool pour into a crust previously baked and cover with a meringue. Take whites of the two eggs, beat a few strokes before putting in a tablespoon of powdered sugar. Beat this stiff and spread first a plain layer, then fancy designs. Brown for a moment in a hot oven.

### Fresh Beef Tongue.

Wash the tongue, cover it with boiling water, and simmer for two hours. Take it up, skin it, take away the gristle and roots, put into a clean kettle, add two quarts of fresh boiling water, one-half pound of seeded raisins, one diced carrot, three tiny onions, one teaspoon of salt, and one-half teaspoon of peppercorns tied together in a bit of thin muslin or cheese cloth. Simmer gently for two hours. Prepare a gravy with one pint of the water, the carrots and raisins, and serve in a boat.

### Grease from Black Goods.

To remove grease from black goods use warm water and soap. Should the material be light in color, gasoline or benzine will be better. Use the gasoline in the open air and as you wash out the spots rub it dry afterward with a clean piece of the same material.

Benzine and gasoline are both inflammable if coming in contact with heat or flame. Salt dissolved in alcohol is often found to be a good thing to remove grease spots from cloth.

### Tasty Hotpot.

One pound of shoulder of lamb or beef cut up into two-inch squares, four potatoes sliced thin as for frying, one onion cut up pretty fine. In a deep dish place first a layer of meat, salt, and pepper. Over this drop one-half of the onion, then a layer of potatoes. Repeat, having a good thick layer of potatoes on top to brown nicely. Bake three hours in a rather slow oven.

### Sink Water Good for Flowers.

If you have a flower bed near the kitchen door, throw on the water which would otherwise be sent down the sink. Parsies and dahlias especially will fairly revel in such a location and reward you with the largest and brightest of blossoms. A sight of the flowers will rest one when tired and worn with the labors of the kitchen.

### Corn Oysters.

One pint of corn pulp; mix with one-half cupful of sweet cream, one well-beaten egg, one-half teaspoonful salt, one-quarter teaspoonful pepper and one scant cup of flour. Mix well and drop by small spoonfuls in equal parts hot lard and butter. Fry on both sides until nicely browned.

### Radish and Cucumber Salad.

Arrange on a bed of carefully washed watercress alternate layers of thin slices of the red skinned radish and cucumbers, pouring over all a French dressing. The combination of the pretty red and two shades of green appeals to the eye, while the crispness and spiciness of the whole satisfy the palate.

## GIANT GEYSER IN YELLOWSTONE PARK

This famous spouter is one of the most interesting sights in the National park.

## STREAM PUMPED DRY.

JAMES B. DUKE EMPTIES JERSEY RIVER FOR BRIDE.

Woolen Mills Employing 1,000 Hands Cannot Run When Water Supply Falls—Work Resumed When Fair Leave.

New York.—In an effort to make his 2,000-acre park look like a fairyland for his bride during their honeymoon, James B. Duke pumped the Raritan river dry at Somerville, N. J., and stopped the operation of the Raritan woolen mills, the largest industry there, which depend on the stream for water supply.

Duke has on his estate artificial lakes covering several hundred acres, besides innumerable fountains and waterfalls. All of these are supplied with water from the Raritan river by means of a great pumping plant with a capacity of many millions of gallons a day, which recently was installed on the river bank above the woolen mills.

In honor of the bride in order that the fountains be made to shoot their sprays high, the lakes were filled to overflowing and cascades dashed with unusual volume over the rocks and the pumps were kept pumping night and day to keep up the display, but all the while the Raritan river, which is the second greatest watershed in New Jersey, kept dwindling until only a tiny stream found its way through its great bed. The intake of the Raritan woolen mills was left dry, and there scarcely was enough water in the wells to supply the big boilers of the mill.

The Raritan woolen mills are owned by the Elmshtein estate and employ more than 1,000 operatives. While the managers of the mills were inclined to do all they could to honor Duke's bride, they suddenly were confronted by a business proposition which led them to summon Manager Smith, of

the Duke estate, to look over the situation.

Mr. and Mrs. Duke had just left the estate for a three weeks' auto tour, and the manager decided there was no need to prolong the display and agreed to stop the drain from the river and give the mills a fair share of the water, so the Duke pumping plant was closed down and the river will be allowed its normal flow for several days.

### BOYS TO PAY FATHER'S DEBTS.

Sons of Ohio Forger Will Devote Lives to Work.

Kenton, O.—The two sons of former Mayor Black, who declares part of the \$28,000 proceeds of his confessed forgeries went to defray the expenses of the boys in college, will dedicate their lives to the repayment of the entire defalcation to the victims, Miss Harriet Stanley and Dr. Sepp.

"I will see that every cent of the money is paid back," announced John Black, 22 years old. "This shall be the first aim of my life."

"It shall be my duty likewise," declared his brother, William. "We will work together to remove the debt. I shall not rest until it is all discharged."

John Black has ended his junior year at Wabash college, Crawfordsville, Ind. He had planned to enter the medical school of the University of Pennsylvania this fall. Instead he will sell molasses and calico over a Bucyrus counter.

The younger brother had planned to return to Miami university. He had completed his first year there.

"We were not extravagant at college," said John, "but it is torture to learn now that every cent we had was stolen by our own father. He loved us dearly. From our childhood days he had always told us how he was determined we should have the best of educations."

## FINDS HIS LOST TEETH IN PLUG

Walters Aid Hotel Guest in Search for Missing Molars.

Chicago.—A guest took a chew of tobacco in the Victoria hotel the other night and started trouble that reached to the furthest limits of the hospitality.

It all came to a focus in the cafe when the guests and waiters regarded with curiosity a guest who suddenly struck a match held it under the table and began a careful search for some lost article.

All the other guests stopped to see where the torchlight procession was heading. The waiters flocked to aid the guest in the hope that they might recover a tip-provoking diamond.

"Done dropped er d'mun, cap'n?" queried the head waiter.

"No, confound it, I've lost two teeth."

The waiter showed a double row of them, not as an alibi, but because the grin required it. The grin did the trick.

Mad as a hornet the guest ran out to Clerk McHenry, who is as noted a peace-maker as ever stayed away from The Hague.

"I'll make you pay for them!" he shouted.

"What?" asked Mr. McHenry.

"My teeth," said the guest.

By this time everybody in the house knew that two bridge teeth, belonging

to a well dressed man, had disappeared mysteriously. The whole house was searched.

"Have you seen two teeth?" became the question of the hour.

Finally the guest pulled a plug of tobacco from his pocket and started to take a bite. There, in the side of the plug, nestled the two missing teeth.

"Here's where we dodge a law suit," said McHenry.

### Uses Fireflies as a Lamp.

Riverside, N. J.—Caleb Hatch was out late the other night with his bicycle with no lamp, and not caring to risk riding through the town without a light on his wheel he picked up a half pint whiskey flask by the wayside and put a dozen fireflies in it. This he hung on the front of his machine and the flashing "lightning bugs" saved him from arrest, as the local policemen were satisfied when Hatch rode by with his wheel "all lit up."

### Fish That Kill Mosquitoes.

Naples.—A cargo of live fish from Australia has arrived here, the species called "blue eyes." Prof. Count Morner, the Swedish consul at Sydney, discovered that the fish lives wholly on mosquito larvae, and the Italian government ordered its representative in Australia to send him home a cargo of the fish. They will be distributed among all the regions infested with insects and malaria.

## WIRE IN MAN'S HEART

A REMARKABLE OPERATION OF PHILADELPHIA PHYSICIANS.

Negro Afflicted with Aneurism of the Aorta—Silver Thread is Coiled Inside Organ and Then Taken Out Again.

Philadelphia.—Nature and a silver wire 20 feet long saved the life of Fred Williams at the end of one of the most remarkable operations on record.

It was for aneurism of the aorta, and was performed on Williams in the Medico-Chirurgical hospital by Dr. James P. Mann.

Williams, who is 39 years old, a negro barber and a man of wonderful vitality, noticed a swelling on his breast some time ago, and went to the Medico-Chirurgical hospital. There he was placed upon the operating table without having been etherized. A hollow needle was plunged into the aorta and through this the silver wire was fed from a spool. The thickness of the wire was about that of a No. 60 cotton thread. As the wire was fed into the great blood vessel it coiled itself closely in the form of a cylinder, which fitted exactly the inner surface of the affected part.

Then the needle was withdrawn and the little wound made by it was dressed.

The process that was then set up in the weakened part was this:

The blood coagulated over the wire and "organized" a new wall, strengthening that which had been weakened by the aneurismic growth.

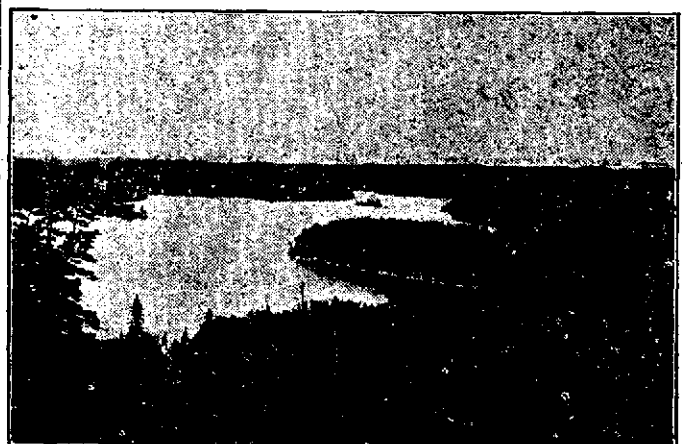

The operation was performed two months ago. Last week he came into the hospital with blood trickling steadily from a pin hole in his chest. The interne and the nurses who saw the trickle were alarmed and sent for the surgeons.

Again Williams was placed upon the operating table. The blood was found to be coming from a wound from which protruded the tip of the silver wire that had been coiled inside his aorta. With infinite care the whole strand was taken out, and then, to the amazement of everybody, the bleeding stopped.

There is every indication that the barber is now absolutely well, and that the new inner coating of the aorta is sufficiently strong to reinforce the weakened tissue that lies outside it.

"I feel as well as I ever did in my life and work every day without fatigue," said Williams.

## ALGONQUIN NATIONAL PARK OF ONTARIO

This scene, Caoba Lake from Lookout Point, Algonquin National Park of Ontario, is taken from one of the most beautiful sections of the Province of Ontario, Canada, and a territory that has been reserved for the special purpose of preserving and protecting fish and game life. It is a popular district for the summer tourist and sportsman, those of whom make it their objective point each summer.

## NOT ELKS' TEETH AT ALL.

Commercial Article Made from Bone, Declares Fur Buyer.

Kansas City, Mo.—Local hide and fur dealers are laughing right loud over the news from Philadelphia that the Elks adopted the plan of discard the elk's tooth as the emblem of the order so "that there may be an end to the wholesale slaughtering of the elk."

Jewelers who handle elk's teeth say the stocks are low, and that they have not been added to in the last two years, but that the price has jumped from 50 cents to \$10 per pair for the teeth. M. Lyons, who has been buying furs in Kansas City for a quarter of a century, declared that 50 cents a pair would be robbery for the commercial "elk's tooth" of to-day.

"Because the supply is so great," was his reason. "The Elks need not worry about the supply running out so long as Armour is running and has a bone pile. Armour sorts the bones for knife handles, piano keys and elk's teeth, among other things. The 'Best People on Earth' may weep as they sit in their lodges, for the slaughter of the poor elk that the members may have their teeth chattering all over their watch chains, their coat lapels, and in their pockets, but it would be going too far to stop the industry of hunting the elk's tooth. The clubman who thinks the elk's tooth is hunted in

the far north might be shocked to learn that it is hunted in the bone pile. The dentists might tell him something about the porcelain elk's tooth."

"About how many elk hides a year does your house get?" was asked, expecting the reply to be several thousand.

"Not over a couple," it was thought.

"How many elk hides are sold annually in the entire United States?"

"Not over 100."

"How many are shot by private hunting parties and the hides carried home?"

"Not over 200 elk a year are shot on the continent," the fur buyer declared ruthlessly.

"That means not over 400 elk's teeth available for the clubmen?" was suggested.

"It does not mean anything of the sort. Half the number of heads are mounted intact, keeping the teeth in them."

Catch Is Woman's Scalp.

Hartford, Mich.—While fishing at Hull lake, near here, men brought to the surface pieces of a woman's scalp with long hair attached. Late last fall screams were heard at the Root home, but as none of the women were at home no investigation was made and nothing was said until the piece of scalp was found.
